

XTPB

Handling of reels, coils and beams

Capacity (kg): On demand

Lifting Height (mm): On demand

SPECIAL PALLET TRUCKS

■ XTPB

Pallet trucks with special shaped forks allow safe and efficient handling of reels, coils and beams.

Customised Trucks:

Pallet trucks for reel, coil and beam handling are built to suit the requirements of the application. The length, width and shape of the forks, as well as the overall truck dimensions, are defined by the specific load to be handled.

XTPB with **extra-sturdy and longer forks** to handle loads with special size and weight.

Extra-compact XTPB with **shortened forks** to handle special loads.

XTPB with **small lifting mast** to **elevate** the load from the floor.

Features in detail: _____

■ SHAPED FORKS:

Shaped forks conform perfectly to the cylindrical shape of the load.

■ COUNTER-FORK FRAMES:

Folding fork frames allow handling a wider range of payload diameters.

■ MACHINE FRAME:

The machine frame is enlarged to ensure maximum stability in case of large loads.

■ XTPB In Operation:

Easy and completely safe handling of even large cylindrical loads.
